

WHEN SUBMITTING MASONRY SAMPLES FOR JAHN MORTAR COLOR SELECTION, PLEASE PAY ATTENTION TO THE FOLLOWING:

TAKE SAMPLE(S): Select locations that represent typical color and texture.
Send one sample for each color needed.

Color: **IF THE STRUCTURE WILL BE CLEANED, YOU MUST SEND A CLEANED SAMPLE**

The lab will not clean any samples.

Texture: Send a tooled sample if patch will be tooled.

Sample size: No smaller than 2" x 2" - larger if possible (No Powder!)

MARK SAMPLE(S): **The surface to be matched must be clearly indicated.**

COMPLETE SAMPLE

INFORMATION FORM: Project Manager or Architect must complete the attached form and return it. One form should be completed for each sample being sent. **We cannot begin to process your samples until we receive the form(s) and payment.** Allow 3-10 business days for processing Jahn Color Samples.

SEND SAMPLE(S)
AND FORM TO: Cathedral Stone Products, Inc.
Attn: Color Lab
7266 Park Circle Drive
Hanover, MD 21076
Fax: (410) 782-9155

You Will Receive:

- One matching dry powder sample
- The dry powder should be mixed and applied on site (from the same location that sample was removed) as a color mock-up.
- Directions for mixing, application, and curing are included or can be found at cathedralstone.com. (The site-applied sample should match our finished laboratory sample)

We will notify you if we determine that a Standard or Premium Jahn color matches your masonry sample.

Please note the following exceptions:

- **Terra Cotta** – We will supply your choice of Standard/Premium color or custom match the surface color. All Terra Cotta repairs must be painted with CSP's Terra Cotta Glazing System to prevent later intrusion.
- **Granite** – It is not possible for us to match the multicolored appearance of granite. We will supply you with a suitable matching background color – the appropriate aggregate (granite dust, etc.) must be added on site to the surface of the damp Jahn mortar; up to 20% of aggregate may be added. It may be necessary to lightly wash the finished repair with a mild acetic acid (white vinegar) to expose the aggregate within one or two days.
- **Marble** – The Jahn M120 Marble Repair Mortar will be supplied in a uniform color. If attempting to simulate veining, on site techniques must be developed, possibly using paint, stains or a darker Jahn mix applied in veins carved into the Jahn repair.

SAMPLE INFORMATION: JAHN MORTAR COLOR MATCH

Please complete this form (one for each different sample) and include it when you send us your sample. Our lab requires this information to formulate a custom Jahn product. We cannot process your sample without it. **For all sample colors the lab fee will be required, and must be received before the color matching process will begin.** Thank you!

Bill to: _____ Ship To: _____

Phone: _____ FAX: _____

Contact: _____ Email: _____

If you would like to pay the lab fee by credit card, please complete the following:

Account Number: _____ Security Code: _____ Expiration Date: _____

Card Holder's Name: _____ Card Holder's Signature: _____
